The Decadia Foundation

Programs Composite — as established across *Evolution* (Book II, *The CISUM Effect* Trilogy)

Institutional Identity

Founded by: Gabriel Stohn (pen name of Peter G. Voisin)

Named for: *Decade* — ten-year commitment cycles. *Deca* — ten pillars of the Ascent of Man. *Dia* — through, across, transcending. The Foundation works across a decade at a time because that is the minimum unit of genuine change.

Logo: A double-line architectural triangle in institutional blue. Three pillars stand on three faces — **Truth** (left), **Justice** (right), **Stewardship** (base). "THE DECADIA FOUNDATION" holds the center.

Soul-Aura: *Intent is everything.*

Governing First Principle: *Dialogue not Debate.*

Governing Ethical Principle: *Truth trumps Privacy.*

Founding Framework: The **LifeLine —** a ten-stage human timeline (Get Out · Grow Up · Get Going · Keep Going · Ease Back · Slow Down · Wind Down · Lay Down · Stay Down). The Foundation's Advisory Board is purposed to seek out and deploy activities that help the Transcendence of HumanKind strengthen one generation at a time. *Inner Vision* — not outer space — is the new frontier. Answers are more likely to be uncovered within our *cerebrals* than in the stars.

The Three Foundation Pillars

1. Prizm Cafés — *est. 2007*

The first Prizm Café opened in 2007 as a reading room and community gathering space attached to the original Decadia Foundation office — modest, local, before the Foundation had a name that anyone outside the founding circle recognized.

By 2084, there are Prizm Cafés in **34 cities across six continents.** Each one carries the original design philosophy:

- Large communal screens for H-gramcasts
- Table monitors for individual ThoughtFlow access
- Open seating that discourages hierarchy
- No reserved tables · No membership tiers
- *The BlindNormal walks in the same door as the Claritan.*

In 2061, the screens were replaced with **H-gram stations** offering full life-size holograms of presenters. Presenters rotate for in-the-round delivery, wearing a small **StreamBeam** so they can see the audience in front of them during presentation.

The Prizm Cafés also seed and shelter the global **Sager clubs —** decentralized philosophy circles that grow out of the Acadore Vael lecture series. Each Sager club is a frequency node. Impossible to surveil.

---

2. Spirit-00-Spheres (S² Units) — *est. 2041, Calishe City*

Joint brainchild of the Decadia Foundation, the Ethics Guild, and the World Thought-Senseis. Strategically placed oasis pods sprinkled through downtown areas — the first opened in the Charlotte District of Calishe City.

Design principle: **spirituality is critically needed in the day-to-day life of the urban resident.** The Sphere is a safe space to give the brain rest and comfort. Ear pods deliver music, books-on-tape, or silence. The pod's ambient benefits extend to other patrons of the location — dual-use by design.

Signature acoustic architecture:

- **Nine Solfeggio frequencies** cycle in ascending order — each held for one full minute, followed by a 9-second silence that allows the body to register what it has just received.

- Lowest: **396 Hz —** energy, stability.
- Highest: **963 Hz —** knowledge, consciousness, fulfillment, spirituality — the frequency associated with the seat of conscious intent.
- Sequence always concludes at 963 Hz. The founders never explained why. No one on the Advisory Board thought to ask.

Signature visual: **Chladni water fountains** whose surface geometry changes shape with each frequency. At 963 Hz the pattern is the most complex and the most brief.

---

3. H-gramcasts — *first broadcast 2061*

Twenty years before Jillene began her Chronicles, the first successful holographic neural-synchronized broadcast — a Thought-Sensei in Lhasa — transmitted a full dimensional lecture to seventeen simultaneous receiving locations. Not video. Not audio. A **synchronized experience** in which recipients reported shared emotional and cognitive states during the broadcast.

The BlindNormal institutions called it a technology curiosity. The Decadia Foundation immediately funded **three permanent H-gramcast studios**:

- Calishe City
- Osaka
- São Paulo

Design principle: any individual, anywhere, can access H-gramcast content. **The Bions can suppress books, ban gatherings, and monitor devices — but they cannot suppress something that is everywhere.**

ThoughtStream Sessions — hosted by Rachael Chiles — function as the emotional-entry H-gramcast series: music therapy meets philosophical broadcast. Her twins Jake and Eddie are the first generation raised on H-gramcast content from birth.

Social & Human-Services Programs

4. The Foster Care Renewal Project — *approved 2031*

Motto: **Preparation, not Protection.**

The Advisory Board reviewed the Foster Care Renewal proposal in 2031. It passed without dissent. By 2084, the program had placed **intentional mentors in foster households across forty-one cities.**

Founding argument, stated not as policy but as biography:

> *What a child receives from the adults placed near them is rarely what those adults planned to give. The Foundation's work is to make the giving intentional. Build the conditions for each thing to become what it already is.*

Ivan Krivic's story became the Foundation's first published longitudinal case study — a foster-care child who became the man who built Brain-Net.

(In Moscow, one of the program's households has a rooftop garden. No one at the Foundation knows why that detail was written into the original program guidelines. The founder simply specified it, at 7:25 PM on a November evening, and no one thought to remove it.)

Philosophy, Public Dialogue & Ethics

5. The Truth Transparency Movement

The public umbrella brand of the Decadia Foundation's Philosophy Lecture Series. Announced as a formal movement to bring "Truth to Power" into public conversation. Its atmospheric message:

> *Truth to Power is coming. Go get your truths ready.*

Open invitation to all — including Bions, welcomed as colleagues, never named as such. A silent second layer of the movement — the *Ethics of Thought* gathering — operates quietly alongside, populated by unnamed Thought-Sensei participants. Plain-sight operation, dual-frequency.

---

6. The Sager Movement

Sager (from Latin *sapere* — to taste, to have good taste, to be wise; akin to Old Saxon *ansebbian*, to perceive). A **Sager** is a philosophy enthusiast.

Sager clubs grow out of Acadore Vael's lecture series, seeded by Prizm Cafés and self-replicating globally. Decentralized. Each Sager club a frequency node. The Sager

movement rests on the **Sager Diagnostic —** the four institutional inversions the Foundation seeks to reverse:

1. Public Servants have turned into Politicians.
2. Faith has turned into Religion.
3. Teachers and Mentors are forced to lower standards.
4. Parenting was once *preparation*; it has become *protection.*

The Truth Transparency Movement is the answer.

---

7. The Ethics of Science Summit — *Devil's Tower*

The first public event of the Truth Transparency Movement. A residency-week scientific summit hosted by the Decadia Foundation, co-hosted by **Black Hills State University** (Spearfish, SD) and the **University of Wyoming**, physically staged at the Devil's Tower National Monument visitor complex.

Open invitation. All welcomed — including the Bions. The theme, *The Ethics of Science*, is publicly unanswerable: no one can oppose an ethics summit; no one can send a counter-narrative against a question.

The Decadia Foundation operating at its highest level — the linebacker doesn't tackle. The linebacker sets the field.

Scientific Research

8. The Scientific Advisory Board

Every reference to the Foundation carries an embedded **white paper.** The board operates the *possible-but-not-provable* axiom as legitimate science.

Named board members include:

- **Dr. Celestine Adaora Nweke —** field entomologist, Odonata specialist, wetlands and West African lineage.
- **Dr. Emilio "Taz" Vasquez-Reyna —** marine biologist, cetacean communication specialist.

Their joint white paper on **cross-species pineal frequency response at 963 Hz** is filed as legitimate science and deployed as scientific ordinance against the Bion calcification agenda.

---

9. The Genetic Memory Research Partnership

A collaborative research line with Esadore Pruitt's genetic-markers work at the Ethics Guild — the ancestral-experience archive that becomes the biological substrate for Transcention. Findings shared with the Foundation and integrated into the pilot programs below.

---

10. The Transparency Initiative

The Foundation's plan to publicly release documentation of institutional practices adjacent to those it studies. Governed by the Ethics Guild in partnership with the Foundation's Advisory Board — origin of Marthe Solvay's declaration that *Truth trumps Privacy* under board pressure.

In Research & Development

*The following initiatives are under active study by the **Decadia Development Board**, the Foundation's Synergy Projects committee. No Synergy program advances to public deployment until it has cleared the Board's research protocols, its synergy metrics, and the ethical gate that governs every Foundation program.*

The Ethical Gate — Marthe's Three Questions

Every candidate Synergy program is held against three questions, delivered in sequence, each answered only after the deliberate silence the Foundation calls the **ThinkPause**:

> **What do we gain? What do we lose? What price do we pay?**

Ethics is a simple mind-flow. Genius lives on simplicity. A program that cannot answer all three cleanly is not yet ready to leave the Development Board's chamber.

Just because you CAN do a thing does not mean you SHOULD do a thing.

Programs Currently Under Development Board Review

- **The Vibration Therapy Program —** a proposed convergence of the Foundation's Foster Care Trauma Healing track with the Genetic Memory research line. Study focus:

live organic (non-digital) vibration — tuning forks at healing frequencies, oboe tones — applied to bone as a means of restoring dormant pineal reception. Under evaluation as a Synergy program because two established Foundation research tracks may already be studying the same phenomenon from opposite ends. Synergy metrics in progress.

- **The Proxen Partnership Initiatives —** a three-part proposal exploring private-industry partnerships for Claritan-compatible Proxen deployment: a Health Care division for civil-service and government-benefit populations, a Cognitive Development pilot line partnered with a peer-reviewed neuroscience laboratory, and an advanced Claritan laboratory configuration for next-generation Proxen research. Held pending Development Board diligence on partner ethics posture and Synergy metric completion.

Both programs remain under review. Neither is a public commitment of the Foundation until Marthe's Three Questions have been answered on the record.

The Governance Loop

- **Decadia Board —** governing board.
- **Advisory Board —** the seat of programmatic decision.
- **Decadia Development Board —** chartered over Synergy Projects. Conducts research and produces synergy metrics on candidate programs before any deployment recommendation. Ethical gate: Marthe's Three Questions. No Synergy program moves to the Advisory Board until it has cleared the ThinkPause.
- **Ethics Guild** *(inside the Philosophical Institute; Esadore Pruitt's domain)* **—** governing ethics body, working in partnership with the Foundation. Four pillars: *Protect · Preserve · Promote · Practice.*

Scope note: the Ethics Guild is a professional body. The Decadia Foundation is *wider* — a civilization-level institution with global reach.

The Reader's Note

The Foundation is built for Stella before she is born. Every program above is preparation architecture for the third generation. Each pilot in *Evolution* explodes in participation across *Destiny*, when the Vibration Revolution clenches the full Transcendence to Andronation.
